

**Graphic Design Intern Wanted.** Are you an uber-talented creative? Able to juggle multiple projects with a smile on your face? Love hard work as much as you love having fun? Want to get some real-world experience with an award-winning team? If you answered yes to all—and do not have an ego to match your big talent—then we want to talk to you.

We are looking for a graphic design intern to assist our creative team in both design and production work.

**Duties to include:**

- Layout, edit and produce print and electronic collateral
- Create electronic files ready to go to print production
- Manipulate and edit photos and other images for print or Web production
- Assist with multi-media elements for websites (flash, videos, photos, blogs, etc.)
- Assist with additional tasks as needed

This is an excellent opportunity to gain on-the-job work experience and stellar samples for your design portfolio.

Knowledge of Adobe Creative Suite in a Mac environment is a must. Knowledge of computer programs such as Dreamweaver, Flash, After Effects or Final Cut Pro is highly desired. Knowledge of both web and print processes and best practices desired. Hours must be completed during the day and in-house; however we will try and be flexible with school and other work schedules.

To apply, send a resume, cover letter, a link to an online portfolio and/or a pdf of work samples (not to exceed 4 MBs) to Stephanie Teig at [steig@motivaction.com](mailto:steig@motivaction.com).
